## PROFESSIONAL PROFILE

Full-Stack Developer with 5 years of experience. Throughout my career I have acted as technical lead within my team, making architecture and planning decisions from early stages. I combine deep technical expertise with strong communication skills and empathy towards client needs, allowing me to translate complex requirements into robust, well-received solutions. I co-led a critical adaptation of our most relevant system in response to a nation-wide legislative change, achieving a rollout with minimal incidents compared to competitors. I am currently expanding my profile towards applied AI and agent-based architectures, seeking to take on greater technical and leadership responsibility.

## PROFESSIONAL EXPERIENCE

2021 - PRESENT

**Software Engineer** / Tracasa Instrumental, Sarriguren, Navarre

Development and maintenance of judicial software across several regions of Spain and Andorra.

- Technologies: .NET (Framework & Core), ASP.NET, React, Angular, T-SQL, Azure DevOps.
- Responsibilities:
  - Full-stack web development, from project scoping through to delivery, on products that have been in production for decades.
  - Technical management of the rollout of an AI-First development model across the department.
  - Research and integration of artificial intelligence into company products.
  - Onboarding and mentoring of new team members.
